

DONCASTERS

Environmental Policy Statement

Doncasters Group supplies our global customers with complex, high quality, competitive products for the aerospace, automotive and industrial gas turbine industries. Employing cutting edge technology and processes our highly skilled and experience team will deliver these products on time, every time.

We are committed to continually improving the way in which our energy is used and to avoiding energy waste across all our sites and activities. We are committed to maintaining both an ISO 14001 and ISO 50001 compliant Management Systems and have adopted a structured approach to energy management.

Doncasters will:

- set objectives and targets for energy performance;
- ensure that information and the necessary resources are made available to achieve our objectives and targets;
- continually improve, monitor and report our performance;
- continually improve our energy impacts;
- comply with all relevant regulatory requirements and best practice, including maintaining both ISO 14001 and ISO 50001 accreditation.
- engage employees, suppliers, customers and other stakeholders to create a culture of energy efficiency;
- encourage and support the purchase of energy efficient products and services;
- distribute and effectively communicate this policy and its importance;
- regularly review and, where necessary, revise this policy.

“Doncasters is committed to achieving energy performance improvements and to driving a culture of energy consciousness”

Doncasters recognises and encourages the contribution that every employee can make towards improving energy performance. We must all work together to achieve our goals and create a culture of energy awareness.

Mike Quinn
Chief Executive Officer
Doncasters Group
